Plant of the Month
Astrantia 'Moulin Rouge'

A fantastic Astrantia with dark red flowers and purple-red tips. Butterflies love them! Long-flowering, from June until September, growing 16-18" tall. Striking for your perennial garden and great for bouquets as well.

Also called Masterwort. This clump forming herbaceous perennial prefers being planted in a full sun to part shade location. Grows best in moist, fertile, humus-rich soil. Will tolerate some drought once established. Plant 12-16 inches apart. The flower heads can be used in dried flower arrangements. Blooms in early to midsummer. Can be divided in spring every 3-5 years. Bonus, they are also deer resistant.
